

Aurex Constructors

Company overview

Our history

The company started out in South Africa as Kentz in 1980 and was later acquired by the Canadian multi-national, SNC-Lavalin, in 2014. The company later changed its name to Aurex Constructors as a result of a management buyout concluded in 2020.

Aurex has evolved in South Africa for over 40 years and continues to build a reputation for delivering sustainable value to customers.

The Aurex Constructors business is made up of a network of experts who deliver Construction, Turnarounds and Maintenance services locally in the Oil & Gas, Mining & Metallurgy, Renewables and Power sectors.

Whilst the company's name has changed we are not changing who we are. The senior leadership team remains the same people that our customers have come to trust, and can continue to count on, as they have done in the past. A 100% South African owned company that shares the country's vision of growing an inclusive economy and building the capabilities of the people in the areas that we work in.

Aurex Constructors

Business overview

Project experience that understands your needs

Aurex Constructors is made up of a network of experts who deliver Construction, Turnarounds and Maintenance services locally in the Oil & Gas, Mining & Metallurgy, Power and Renewables sectors.

Who we are

At Aurex Constructors we stand for **UNCOMPROMISING EXCELLENCE**

We achieve and maintain excellence through **INTEGRITY, TRUST AND EXCEPTIONAL QUALITY**

By delivering excellence, we improve not only our company but **OUR PEOPLE, OUR INDUSTRY, OUR ECONOMY AND OUR WORLD**

Through a **HIGHLY SKILLED WORKFORCE**, we provide agile solutions that meaningfully address the varied needs of our customers and our society at large

Infrastructure and assets

Our Midrand office houses ± 90 functional and operational employees who support our project teams. Inqaba, our strategically positioned facility in Secunda, incorporates artisan training and assessments and an assets laydown area.

Our fabrication facility in Chamdor is capable of delivering 30,000 weld diameter inches of piping pre-fabrication each month. The wide variety of weld procedures qualifies Chamdor to self-perform welding of most grades of steel, which maximises efficacies when it comes to the interface between fabrication and site installation.

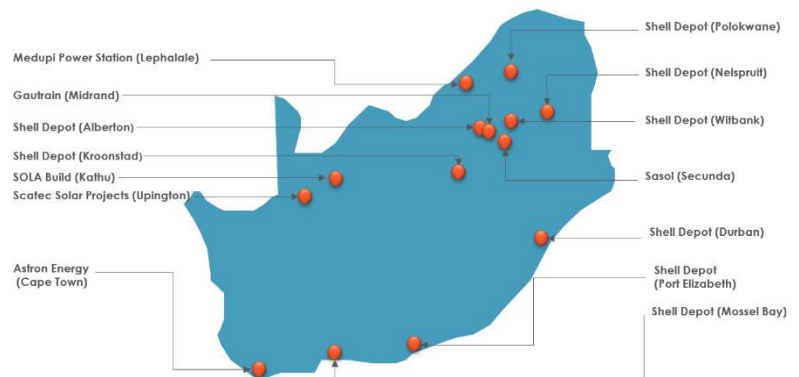

What we deliver

Quality end-to-end solutions that span **CONSTRUCTION, TURNAROUNDS AND MAINTENANCE** projects across **ALL ENERGY SECTORS**.

LEVEL 2 BROAD-BASED BLACK ECONOMIC EMPOWERMENT

Aurex Constructors is passionately committed to the inclusive process of **GROWING AND SUPPORTING BLACK OWNED AND EMERGING BUSINESSES** through preferential procurement, supplier development and continual focus on talent attraction, retention and development.

Geographical project footprint

Safety

Deeply committed to **SAFETY** performance, to achieving an **INJURY-FREE** workplace where nobody gets hurt and everyone goes home safely after every shift.

In 2020 we achieved 4.8 **MILLION MAN-HOURS** with a **LTIR of 0.00**

Driven to deliver uncompromised sustainable excellence in the energy sector

At Aurex Constructors, we are focused on the future of the construction industry and are doing our part to ensure that we deliver on uncompromised excellence. To us, this means providing quality end-to-end construction, turnarounds, and maintenance solutions across all energy sectors.

Multi-discipline construction solutions

Aurex Constructors are leaders in the field of self-performing structural, mechanical, electrical, instrumentation, piping and platework (SMEIPP) construction projects in South Africa. Our knowledgeable and experienced team ensures that the construction of new plants and retrofits, refurbishments and expansions of existing projects are managed efficiently and according to your requirements and schedule. As a business, we strive to perform and work with our customers to deliver successful construction projects time and time again.

Turnarounds and Shutdown solutions

We understand the impact that turnarounds have on your business, which is why we have worked tirelessly to develop an innovative cradle-to-grave approach that reduces the impact of downtime. Our experienced team effectively manages all turnaround solutions to ensure that your performance and deadline needs are executed safely. Aurex Constructors prides itself on being the turnaround specialist of choice and delivers on uncompromising excellence in this field.

Maintenance solutions

At the center of project sustainability and asset management is the need for long term maintenance solutions. At Aurex Constructors, we understand that maintenance activities critically impact your assets and business operations, which is why we call on our years of industry experience to align our solutions with your needs and deadlines. We strive to deliver on agile maintenance programs that help reduce risk, lower costs, increase performance and the overall sustainability of your operations.

Our vision

To be the trusted construction, turnarounds and maintenance service provider of choice providing agile and innovative end-to-end solutions

Our values

Quality

We strive to deliver uncompromising quality in all aspects (both input and output).

Responsibility

We act with responsibility, thereby building trust. We take our responsibility to our people (safety), our industry, our customers and our economy very seriously.

Tenacity

We are bold, brave and determined in our goals and in challenging the status quo. We are unwavering in our quest to deliver only the very best.

Integrity

We work ethically and are trustworthy, delivering on our commitments and promises.

Aurex Constructors

Business overview

Past project experience as a unified team that meets your needs

Oil & Gas

We have delivered the highest quality projects at the **Sasol Operations in Secunda and Sasolburg** for over 38 years in line with multiple back to back 5-year framework agreements. We continue to execute maintenance, turnarounds and complex structural, mechanical, electrical, instrumentation and piping (SMEIP) construction services at their facilities.

Mining & Metallurgy

International experience delivering SMEIP construction services on the **Moatize project** for **Vale's** coal processing plant, coal load-out station, auxiliary buildings and conveyor network in Tete Province, Mozambique.

Infrastructure

Performing maintenance on the **Gautrain** tunnel ventilation system in line with a 5-year extended contract that includes fire protection, water management maintenance, security access management system (SAMS) and station and tunnel management system (STMS).

Renewable energy

Designed the anchoring methodology for tracker piles and civil works for the **Sirius and Dyasonsklip 1 & 2 solar plants** in **Upington** for **Scatec Solar**. Scope included trenching, roads, buildings and foundations for the inverter stations. We assisted with the optimisation of the customers initial plant layout to achieve maximum constructability and performance and provided civil and electrical engineering services, construction of the plant with all associated disciplines, pre-commissioning and final commissioning assistance.

Level 2 broad-based black economic empowerment

Aurex is passionately committed to the inclusive process of **GROWING AND SUPPORTING BLACK OWNED AND EMERGING BUSINESSES** through preferential procurement, supplier and enterprise development and continual focus on talent attraction retention and development.

Corporate social responsibility

CSR is at the heart of Aurex's business because we care about the people in the communities where we work. Our programs seek to add **SUSTAINABLE CONTRIBUTION AND MEANINGFUL PARTICIPATION** for all designated vulnerable groups.

We focus CSR initiatives on childcare, poverty alleviation, skills development, strategic interventions and employee volunteer programs.
